

# Levels of Data Collection

## National Level Data Collection Questions

What are the broad trends in ACEs data that may present a starting point for learning more?

## State, Territory, Tribe, or Jurisdiction Level Data Collection Questions

What is the baseline estimate of ACEs currently experienced in this state, territory, tribe, or jurisdiction?

What individual ACEs are most commonly experienced in this state, territory, tribe, or jurisdiction?

What demographic subpopulations are most disproportionately impacted by ACEs in this state, territory, tribe, or jurisdiction?

## Local or Community Level Data Collection Questions

What is the scope of the broader problem with a specific community?

Where and when do ACEs most likely occur and who is at greatest risk here in this specific community?

What health and societal circumstances and impacts are unique to this specific community?

## Impact Level Implementation Questions

What tailored and relevant prevention or intervention strategies can we recommend and feasibly implement?
